The FIRM

“Aravon” is an Italian manufacture factory of Bettetini family. It started to realized faucets and inox sinks for houses’s furniture from 1961.

The first generation: Franca and Giorgio

We have matured the experience to give more quality, about during, about nice products and about a fast installing.

In all these years, we have never stopped recording every single possible datum on our products to instruct the new generations of workers.

Date, experience and make a will, test some of it under worse environment conditions and decide to continuous to products in Italy, are all positive recording to guarantee to you the comfort that look for and a long use of it.

For Your Work
.. where the conditions are worse
